

- 3.1 times the weight loss than diet and exercise alone
- Safe and effective weight loss solution
- Over 220,000 placements worldwide
- Now FDA approved
  
- What is ORBERA™?
  - Comprehensive two-part program designed to provide effective, motivating results that you can see. With ORBERA™ patients on average lose 3.1 times the weight they would with diet and exercise alone
  - Starts with a soft balloon placed in your stomach for six months to reinforce proper portion control.
  - The ORBERA balloon take up space in your stomach helps you eat smaller meals.
  - Balloon is temporary and placed in your stomach for six months without surgery or any incisions
  - Patients will receive coaching from a team of experts, which may include a dietician, psychologist, and exercise physiologist
  - Coaching continues after balloon is removed at six months for a total of 12 months
  
- The Procedure: Placement and removal
  - Non-surgical procedure done under a mild sedative, the thin and deflated ORBERA™ balloon is placed into the stomach. It is then filled with saline until it's about the size of a grapefruit. The procedure typically takes about 20-30 minutes so you can go home the very same day
  - At six months, the balloon is removed in the same way it was placed. Through a non-surgical procedure done under a mild sedative, it is deflated first then removed
  
- What to Expect
  - The weight loss is rapid with the majority of weight loss typically occurring in the first three months of treatment
  - On average patients lost 3.1 times the weight loss of diet and exercise alone
  - The adjustments to your eating habits and your continued efforts to stay active will greatly influence your results
  -
  
- To qualify for ORBERA™, you should:
  - Be an adult
  - Body Mass Index (BMI) of 30 to 40
  - Be willing to participate in a medically supervised program
  
- ORBERA™ Advantage
  - After six months with the ORBERA™ two-part program, people lost an average 3.1x the weight patients lost with diet & exercise alone.
  - Proven to keep the weight off even after the balloon is removed.
  - A more than 20 year history of helping thousands of people lose weight.
  - More than 220,000 ORBERA™ balloons have been distributed worldwide in over 80 countries.
  - With the FDA approval of ORBERA™, patients now have a safe and effective treatment option.
